Beart-rending Accident—The steamer Griffith Burned and over 200 lives lost. CLEVELAND, June 17.

The fine steamer Griffith while on her way up the Lake, took fire, about 5 o'clock this morning, when about 20 miles below Cleveland, and was burned to the water's

A man who swam ashore for help, has reached Cleveland, and reports that only 35 of these on board were saved, and these had to swim ashore, there being no other vessel near to render assistance. It is reported that there was two or three hundred passengers on board, most of whom were emigrants on their way to the west.

The scenes on the burning wreck were described as having been agonizing in the extreme: It is impossible as yet to as-certain the cause of this disaster, or any further particulars. It is the greatest calamity that has occurred on Lake Erie, since the barning of the Erici some years

Foreign Items.
In English politics there are three great questions occupying popular attention, these are protection, education and church reform, The first enlist chiefly the sympathies of the great land proprietors, and is not likely to be re-established; the second is growing more into favor and govern-ment patronage; and all except the benef-iced clergy and their friends are crying lustily for the third.

In the house of Commons, on the 20th ult., the motion of Lord Ashley for an address to the Queen, to take measures to stop throughout the United Kingdom, the collection and delivery of letters on Sunday, was passed by a vote of 93 to 63.

The Liverpool dock quayants crowded with emigrants, (mostly Iriish) awaiting vessels to carry them across the Atlantic. The demand for ships in this trade has been more active lately than ever be-

A new election is to take place in the department of the Bas-Rhim, in consequence of the resignation of one of its representatives. M. Emile de Gerardin is again before the people, and the journal La Presse and the Evenement say his election is cer-Inin.

On the evening of the Greek festival of Easter, at Constantinople, Halil Pasha de-manded a list of all the Greeks who were imprisoned for debt, paid all their debts, and liberated them from prison, and gave each of them a sum of money, to be ex-pended by them during the Easter holidays. He must be a good fellow that !
There have been disturbances in the

south of France particularly at Marseilies; they are supposed to be connected with some intended movement in favor of Hen-

In Austria, the state debt has increased to 1,158,000,000 florins. In the course of year the 1848'9, the expenditure surpassed the income by nearly one hundred& forty millions of florins. This is a serious state of things, and will embarrass the government a great deal,

There is to be a meeting of sovereigns

at Warsaw, at which the Emperors of Russia and Austria, and the Prince of Prussia are expected to attend.

The people of Transylvania are in much confusion. Gangs of banditti, the dispersed soldiers of the late war, infest the country, and are nunted down by the government.

The children of Kossuth, and their aunt are permitted to go to their illustrious parents exiled in Asia Minor.

EVIL INFLUENCES .- The great amount of insanity in the Agricultural portion of one of the States, has been ascribed, in part to the want of public amusement. We have already offered a few remarks upon the physical depression produced by fanacticism, This cause is directly connected with two others assigned by medical writers, . "repulsive and monotonous employment," and "want of public amusements;" for fanacticism condemns and suppresses public amusements & renders any empolyment re-

pulsive and monotonous.

Fanaticism condemns dancing. Yet no amusement, within proper limits, physical and moral, is more salutary to body and mind. It condemns theatrical exhibitions. Yet the mischief in these is in their abuse, and in accompaniments not necessarily connected with them. They might be offered in towns and villages, free from all the corruptions so necessarily connected with them in cities.
The athletic games so carefully maintained among the ancients, and still preserved in many parts of Europe, are much needed a-mong the adult population of our towns and villages. They are very unwisely confined to boys and even discouraged among them. Musical and debating societies ought to exist in every country town, and to include all who have the least talent for music, and all who can, as well as who cannot speak. Debating societies are advantageous to hearers, as well as to talkers. Every clergyman ought to give a scientific lecture to his congregation, at least once in a month, on a Sunday, in the form of a sermon, accompaied with the usual exercises. As God made the physical world, and made knowledge of part of moral duty, no clergymen could that this would interfere with the apriate duties of the Sabbath. Every physician in a country town should be required to give a periodical lecture upon science, to the pe ople of such town and should receive ent for it from its treasury. And not payment for it from its treasury. And not each town, but each schoolmaster should be required to give a monthly lecture to the people of his district, on some literary

To the enlightened, no employment is attractive than agriculture. Instead being repulsive and monotonous, it af-ris, to cultivated minds, a most fascinating ariety. Its repulsive features are found only promuce of its pursuers; and hence so y leave it for professional, mercantile machanical life. Science, literature and nal public amusements would render ulture the most attractive of all employ-

A specimen of art and industry is men-loued in a Maine paper, exhibited in a draw-ing by Major King, son of the ex-Governor, attitled the 'illustrated Dictionary," drawn on the surface of thirteen inches square, and ontaining twelve thousand, three hundred bjects. One of the objects on the drawing the Lord's Prayer, on a surface considera-r smaller than a five cent piece. A large ce has been offered for it in New York.

PAYER'S ELECTRIC LIGHT.-The Penn-

"Parties in this city have entered into bends to give the inventor one million of dollars for his invention, with a view to have it generally applied to practice; and a commencement will be made within ten The Third Regiment at New York.

The Herald says it has been put in posers-sion of some important facts in relation to the Cuban expedition:

Three of the officers who fought at Carde-nas under General Lopes, have arrived in New York, and state that many of the troops that landed at Cardenas are now at New Orleans still organized & recruiting, waiting for a fortunate moment to act in concert with the second division, whose, whereabouts seems to be mysterious, and the third division in New York and its sicinity, who have not yet sailed, but who are ready for action.— The three officers who arrived there from New Orleans, have joined two who were here all the time, keeping up the organization, and communicating with the expeditionists at a distance. These five gentlemen are holding their secret meetings night after night, and are well watched by government spies; but they in their turn know the spies & watch them as well, A craft, not long since built, has been chartered to carry provisions, arms and men outside Sandy Hook, where they are to be received by another vessel, and conveyed to their destination. On Long Island there are munitions of warsecreted, & there are more in Harlem.& in boarding houses in the upper parts of the city. It is stated that Gen. Lopez is superceded in the command, and that next time it will be in the hands of an American.

THE TENTIMONY OF TEETH. Sir Peter Hacket, who fell at Braddock's defeat, wore false teeth. Major Hacket, his son, went to the battle ground many years after his father had fallen, and identified his remains, to his satisfaction, by the artificial teeth which he found in the grave. There were other slight circumstances to confirm his opinion that the remains were those of his father, but the teeth were chiefly relied upon. A correspondent of the Boston Post alludes to this fact, as a coincidence with some recent events in that

The Germana have recently taken a particular fancy to raising potatoes. The following is their method of producing the greatest good for the greatest number :

"The potnto is planted whole, without any preparation, only allowing a little more space than usual. When the plants have attained the height of the hand, they are also cleaned and heed as usual. When, however, the time for drawing up the earth around them has arrived, the following process is adopted instead :- "The green stalks are divided and laid down by the hand on the flat soil in the form of the spokes of a wheel and covered with the neighboring earth-the operation being readily performed by placing the foot on the plant. Some weeks later the leaves begin to push through the soil, when they are again laid down and covered with four inches of earth. This is all the labor required, and occupies about the same time as the ordinary hoeing-up process, but it produces six times more fruit. The subterranean stalks are covered with potntoes in the form of a wreath or chaplet.""

AMERICAN FACILITIES OF LOCOMOTION .-The Providence Journal says that a gentleman who has recently returned from New Orleans by way of the Mississippi, furnishes us with the following illustration of the low rates of fare on the route:"From New Orleans to Cincinnati, in a first-class steamboat, \$12 and found; from Cincinnati to Sandusky, \$6, meals sixty cents; from Sandusky to Buffalo, \$4 and found; from Buffalo to New York, by the Erie railroad, \$10,50, meals \$1,50; from New York to Providence, by the Stonington railroad, \$3, meal fifty cents; total \$38,60, for the cost of traveling and meals from New Orleans to Providence, Rhode Island. To this is to be added porterage, which depends upon the amount of baggage, and which is nothing for a velise or carpet bag that a men can take in his hand.

JOHN BULL .- With all his burly strength and bull-dog tenacity of grip, we consider John Bull in the main a rather clumsy fellow Not stupid, by any means, but only something dull, ponderous and heavy-gaited; or as the farmers say of a certain description of horses, "logy." He wasn't always so, and we are inclined to think that he has grown dull with age and good living-heavy with port, porter, portliness. The Romans attached to the word pinguis (fat) not only the idea of corporeal obesity, but also that of mental torpor, as if the former condition of necessity implied the latter. And the Romans knew a thing or two, that's certain. Somebody has said that the common diet of the Irish has produced in that people a sort of "potato-mindedness;" and veryfikely John Bull's favorite pabulum has served in the same way to render him rather bovine and pudding-headed. Now and then, however you find an Englishman who has an idea or two beyond the wisdom or ms grandfather, and who can see what is doing outside of cockneydom. and understands matters not embraced in magna charta. The editor of the London Economist is one of these, and sometimes discovers a great governmental fact like the following: "In America," says the Economist, society moves faster than legislation, and does not depend on that to regulate its future existence; while members of Congress are threatening dismemberment, there is gathing round the states, as a neucleus, other states ready to adhere to it and increase it on every side .- Boston

CIVILIZATION OF ALABAMA,-The Montgomery Advertiser, speaking of Senator Ben-

"We should like to see the old traitor attempt to 'stump' it in Alabama. We have some crooked trees here, with a certain sig-nificant curve, that could be more appropriately applied to his use. Are we under-stood? If not a few feet of hemp will render all plain."

A NEW COLONY IN GEORGIA.-An English gentleman, agent for a London Emi-gration Company, has purchased about one bundred and fifty thousand acres of land in Irwin County, Georgia, for the purpose of getting it settled by English operatives and manufacturers. They are situated in a fine cotton-growing region, near navigable streams copiously supplied with water power, and possess an abundance of timber. He will urge upon his company the speedy construc-tion of a railroad from their lands to some of

the principal towns in the vicinity. KNEW HIS CATECHISM .- A little fellow was questioned by his mother, last Sunday from the catechism. Among other questions, she asked. "Who was cast into the flery furnace ?" With much promptness he replied, "Dr. Parkman."

"May coquettish, sometimes pettish, smiling often through her tears; in rotation, yields her attation, and the welcome June appears. Gentle, smiling, care-beguiling, with a rose-bud in her hair—April foolish—May is coolish—June warm hearted is, and fair."

The following question is said to have ereated a tremendous excitement before the Hardscrabble Debating Institution : "What is the difference between there

being conscience enough in all women, and women, enough in all conscience ?"

-A baker's boy of ten years old, Fancying himself a man, A milk-maid met, of the same age, A-carrying a can. He threw his arm about her neck,

And kissed her soft as silk; "Nature," I cried, "how strong thou art Even on bread and milk !" - Boston Post.

A young lady once remarked that there was but one word in the bible she wished altered, and that was in the passage—"Who-soever shall smite thee on one cheek, turn to him the other also." She would have the word "smite changed to "kiss."

TRICKS OF QUACKS.

Let Everyaddy Read this Carryllay.—There is a Sarsaparilla for sale in the different towns called S. P. Townsend's Sarsaparilla. It is advertised as the ORNSI-NAL, GENUINE, and all that. This Townsend is no doctor and never wat; beit was formerly a worker on ratifereds, causia, and the filts—yet he assumes the title of Dector for the purpose of gaining credit for what he is not. He says "he has attended two medical schools, and practiced for fifteen years!!" Now the truth is, he never practiced medicine a day in his life! Such exifyld, wicked misrepresentation looks bad to the character and veracity of the man, I wish meet singenerly, he had never sade those statements of himself or of me. When will men learn to be hopen and truthful in his libeit dealings and intercourse with their fellow then! He applied to one Run Clapp to assist him in manufacturing his mixture, estating the large since he would make, as an indusement to embark in the besidens. These men have been insulting and libeiling me in all possible forms, in order to impress the public with the belief that the Gld Doctor's Sarsaparilia was not the genuine, or ginn! Sarsaparila, made from the Gid Doctor's Original Recipies. This S. P. Townsend says I have sold the use of my name for fa week. I will give him \$500 if he will produce one single solitary proof of this. His assessment of Thompson, Skillman & Co. are nothing but a tinue of alsehoods, simply made to decive the public, and keep the truth down in regard to his souring, fermenting compound. This is to caution the public to purchase hone but Old Dr. JACOB Townsend's Sarsaparilla, having on a the Old Doctor's likeness, his family Coat of Arms, and has signatureacross the Coat of Arms.

Principal Office, 102 Nassan. street, N. Y. City.

JACOB TOWNSEND.

Old Dr. Jacob Townsend,

Genuine Townsend Sarsaparilla. Old Dr. Townsend 14 now about 70 years of age, and has longbeen known as the AUTHOR and DISCOVERER of the GENUTE ORIGINAL. TOWNSEND SARSAPARILLA." Being poor, he was compelled to limit us manufacture, by which means it has been kept out of masket, and the sales circumscribed to those only who had proved its worth, and known its value. It had reached the ears of many, nevertheless, as those persons who had been healed of sore diseases, and saved from death, proclaimed its wooderful.

HEALING POWER.

This GRAND AND UNEQUALLED PREPARATION is manufactured on the largest scale, and is called for throughout the length and breadth of the land, especially as it is found incapable of degeneration or deterioration.

Unlike young S. P. Townsend's, it improves with age, and never changes but for the better; because it is prepared on actentify grangings by a scientific man. The highest knowledge of Chemistry, and the latest discoveries of the art, have all been brought into requisition in the manufacture of the clid Dr's Saraparilla. The Saraparilla rock, it is well known to medical men, contains many medicinal properties, and some properties which are inert or useless, and others, which if relatined in preparing it for use, produce fermestration and acid, which is injurious to the system. Some of the properties of Saraparilla are so polatis that they entirely evaporate and are lost in the preparation, if they are not preserved by a reintific processe, known only to those experienced in its machinature. Moreover, these rolatile principles, which fly off in vator, or as an exhalation, under heat, are the very exsential micelical properties of the root, which give to it all its value.

Any person camboll or size with root till they get a dark colored liquid, which is more from the coloring matter in the root than frommything sleaf they are a the expense the HEALING POWER. Any person camboil or siew th. root till they get a dark colored liquid, which is more from the coloring matter is the root than frummything slass that we have a substantial or vapid found, sweeten with sour molasses, and then call it "SARSAPARILIA EXTRACT or SYRUP"

GENUINE OLD DR. JACOB TOWNSEND'S SARSAPARILLA.

SARSAPARILLA.

This is so prepared that all the inert properties of the Sarsaparilis rot are first removed, everything capable of becoming acid or fermentation is extracted and rejected, then every particle of medical virtue is secured in a pure and concentrated form; and thus it is residered incapable of losing any of its valuable and healing properties. Prepared in this way, it is made the most powerful agent in the Cure of Innumerable Diseases.

Hence the pason why we hear commendations on every ride in its farer by men, women, and children. We find it doing wooders in the cure of CONSUMPTION, DYSPEPSIA, and LIVER. COMPLIONS, DYSPEPSIA, and LIVER. COMPLIANT, and in RHEUMATISM, SCROE, ULA, PILES, COSTIVENESS, all CUTANE. OUS ERUPTIONS, PIMPLES, BLOTCHES and all affections arising from

IMPURITY OF THE BLOOD. IMPURITY OF THE BLOOD.

It peesses a marvolous efficacy in all complaints arising from Indigestion, from Acidity of the Stomach, from unequal circulation, determination of blood to the head alpitation of the heart, cold feet and hands, cold chilts and not flashes ever the body. It has not its equal in Colds and Coughs; and promotes easy expectoration and gentle perspiration, relaxing strictures of the lungs, throat and every other past.

But in nothing is its excellence more manifestly seen and acknowledged then in all kinds and stages of FEMALE COMPLAINTS.

It works woulders in cases of Fluor Albus or Whites.

FEMALE COMPLAINTS.
It works wouldrs in cases of Fluor Albus or Whites,
Polling of the Womb, Obstructed, Suppressed, or Painful
Menses, Irregularity of the menstrual periods, and the likeand is effectual in cuting all the forms of Kichney Diseases.
By removing obstructions, and regulating the general
system, it gives tone and strength to the whole body, and
thus cures all forms of eyelem, it gives tone and thus cures all forms of Nerwous Diseases and Debtitty.

Nerwous Diseases a great variety of other materials of relieves a great variety of other materials.

eystem, it gives tone and strength to the whole body, and thus cures all forms of Nervous Diseases and Debility, and thus prevents or relieves a great variety of other maladies, as Spassal privation, Newagia, St. Vitus' Dunce. Streaming, Epileptic Fits, Convulsions, &c.

R cleances the blood, excites the liver to healthy action. tones the stomach, and gives good digestion, relieves the bowels of torpor and constituenton, allays inflammation, parifies the skin, equalized the circulation of the blood, producing sentle warmth govern all over the body, and the meanethle persystation; relaives strictures and tignises, to more all obstructions, and invigorates the entire nervous system. Is not this then

The Medicine your pre-eminently need?

But can any of these things be said of S. P. Townsend's inferior article I This young man's liquid is not to be

COMPARED WITH THE OLD DR'S, because of one GRAND FACT, that the one is INCAPA-BLE of DETERIORATION, and

NEVER SPOILS,

while the other DOES: souring, fermenting, and blowing the bottles containing it into fragments: the sour, acid inquid exploiting, and damaging other goods! Must not this horthic compound be poisonous to the system 1—What! put acid into a system stready diseased with acid? What causes Dyseppas but acid! Do we not all know that when food sours in our stomachs, what mischief it produces!—fatulence, hearthurn, papintation of the heart, liver compaint, darrhora, dysentery, colic, and corruption of the blood! What is Scrofuls but an acid humor in the body what produces all the humors which bring on Eruptions of the Skin, Scall Head, Salt Rheum, Erystpelas, White Swellings, Fever Sores, and all ulearations internal and external. It is nothing under heaves but an acid substance, which sours, and thus spoils all the fluids of the body, more or less. What causes Rheumatism but a sour and acid fuid which noninuates itself between the joints and eisewhere, critating and inflaming the delicate tissues mon which it acts? So of nerrous diseases, of impurity of the

which afflict human nature.

Now is it got horrible to make and sail, and infinitely secree to use this

SOURING, FERMENTING, ACID "COMPOUND" OF

S. P. TOWNSEND,
and yet he would fain have it understood that Old Dr. Jacob Townsend's Genesies Original Streagarille, is an IMITATION of his inferior preparation?!

Heaven forbid that we should deal in an article which would bear the most distant resemblance to S. P. Townsend's article and old Dr. Jacob Townsend's strike?

We wish it understood, because it is the absolute truth, that S. P. Townsend's article and old Dr. Jacob Townsend's Saraparille are heaven-tride apart, and infinitely discsimilar; that they are unlike in every particular, having not one single thing in common.

As S. P. Townsend is no doctor, and never was, is no chemist, as pharmaceulist-kpows no more of medicine or disease than any other common, unscientific, unprofessional men, what gustrasties can the public have that they are resolving a genuine scientific, medicine, containing all the virtues of the articles used in preparing it, and which are incapable of changes which might proder them the AGENTS of Disease instead of health?

But what iles should be expected from one who knows and and of the prepared of some experiences to cook and serve up even a common decent meal. How much more important is at that the persons who manufacture medicine designed for WEAK STOMACHS AND ENFERBLED SYSTEMS, should know well the medical properties of plants, the best manner of securing and concentrating their healing virtues,

WEAK STOMACHS AND ENFEEBLED SYSTEMS, should know well the medical properties of plants, the best manner of securing and cententrating their healing virtues, also an extensive knowledge of the various discasses which affect the human system, and how to adapt remedes to heas diseases?

It is to arrest franch upon the unfortheate, to pour balm into wounded humanity, to kindle hope in the despatring bostom, to restors health, and bloom, and vigor that the created and bostom, and to bunish infirmity that OLD DR. JACOB TOWNSEND has SOUGHT and FOUND the opportunity and means to bring his Grand Universal Concentrated Bennedy within the reach, and to the knowledge of all who seed at that they may learn and know, by joyful experience, its

cial Jurisprudence.
Terms—\$50 per session. All communications pertaining to this department must be addressed to E. W. M. KING, Esq. Memphis. Tenn., March, 1850.

The Faculties, for intellectual abilities, moral worth and professional acquirements, will compare favorably with the most distinguished in our country.—The Medical Faculty constitutes an anomaly in this or any other country—all of them are able lecturers and the best of teachers.

Those who will contemplate our geographical positiou and the extent of our population, can have no doubt as to the eligibility of our situation for an enterprise of the kind. As to health, including all seasons of the year, we deny that any other city has more. A common error exists in the minds of many students relative to the place of studying med-

students relative to the place of studying medicine: those who intend practicing among the diseaser of the west and south should certainly educate themselves at a school whose Faculty are practically acquainted with these diseases.

That the public may be satisfied of the permanency of this school, we feel it our duty to state, that the Trustees and Faculty form a user in action, which augurs well for its future success, and that the peculiar internal organization which connects them, cannot be interrupted.

E.W. M. KING,

President of the Memphis Institute,

Inflammatory Rheumatism. THE AMERICAN RESUMATIC BALBAM!! A New Remedy Lately Discovered

IN the vegetable kingdom-a sure and perma next cure for all Rheumatic Complaints, such as Inflammatory, Chronic, Acute and Mercurial Rheumatism, Gout, Lumbago, Spinal Affec-tions, etc., etc.

tons, etc., etc.

This medicine has long been sought for. It has been said that Rheumatsm could not be cured; but there is a remedy designed by nature for the cure of every disease that the human system is subject to. At last a remedy has been found that cures Rheumatism of the worst form—one of the worst torm. been found that cures Rheumatism of the worst form—one of the most valuable vegetable productions of the earth—the greatest and most important discovery of the age, and a wonderful blessing to the human family. It cures without sickening or debilitating, and renews strength and vigor to the whole system. It has cured, during the past three months, over 500 cases that were considered incurable.

Certificates of the curative properties of this medicine can be seen by calling on the Agents.
